

HM-126F HANDLING OF HAZARDOUS MATERIALS TRAINING

The Petroleum & Convenience Marketers of Alabama is offering a one-time training session for HM-126F Handling of Hazardous Materials. The U.S. DOT requires HM-126F training once every three years for anyone involved in the loading, unloading, driving or managing of hazardous materials (petroleum products) or anyone involved in the process that prepares the shipping papers, labeling or packaging of hazardous materials. All new hazardous materials employees must have HM-126F training within 90 days of their date of hire. Existing employees must be re-trained within 90 days of any change in their hazardous materials duties. P&CMA offered this training in 2012 in various locations around the state during our regular training seminars and will not be offering HM-126F training again around the state until 2015. We are, however, providing a make-up class, held once a year in the P&CMA office for all HAZMAT employees, who must have HM-126F certification. Space is limited so register early!

HM-126F Handling of Hazardous Materials
Tuesday, October 22, 2013
8:30 a.m.—12:00 noon
P&CMA Office
4264 Lomac Street
