(On-Site Pick Up Required)

The Alabama TOOLS Reference Handbook

In 2014, the Alabama Underground and Aboveground Storage Tank Trust Fund Management Board approved a program by which tank owners and operators could receive on-going education related to UST/AST operations. This program, the Alabama Tank Operator Online Learning System (Alabama TOOLS, www.alabamatools.com) is made up of printed, online and live educational sessions designed to provide tank owners and operators with a basic overview of UST/AST systems. This program DOES NOT replace Operator Training requirements for "A and B" tank operators but instead is intended to serve as "continuing education" for those involved in the daily operation of UST/AST systems.

The *Alabama TOOLS Reference Handbook (2nd Ed.)* provides a basic overview of UST/AST systems for tank owners and operators including changes to state and federal UST Regulations adopted and enacted in 2018. It is a publication of Alabama TOOLS, LLC in cooperation with the Alabama Department of Environmental Management (ADEM), the Petroleum & Convenience Marketers of Alabama and The Alabama Underground and Aboveground Storage Tank Trust Fund Management Board.
